OBJECTIVE

Junior Software Engineer with hands-on experience in Python, AI-driven applications, data pipelines, and software development. Seeking a challenging opportunity in a growth-oriented organization to apply my technical expertise, contribute to innovative solutions, and grow as a versatile software professional.

Education

Bachelor of Technology (B.Tech) in CSE - Data Science — **Tadepalligudem, India**
Sasi Institute Of Technology & Engineering — *November 2022 – April 2026*
- CGPA : 8.97

Higher Secondary Education in MPC — **Attili, India**
S.V.S.S Arts & Science Junior College — *June 2020 – March 2022*
- Percentage: 78%

Secondary School Education — **Attili, India**
Indira Gandhi Girls High School — *April 2020*
- Percentage: 97%

SKILLS

- **Programming:** Python, JavaScript, SQL, Data Structures & Algorithms
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
- **Backend:** Flask, Node.js, Express.js, REST APIs, Spring Boot (Basics), Object-Oriented Programming
- **AI / Generative AI:** Generative AI, LLMs, RAG, Prompt Engineering, LangChain, Vector Embeddings
- **Database & Tools:** MongoDB, Git, GitHub, VS Code, Postman, Jupyter Notebook
- **Core Concepts:** DBMS, Operating Systems, Computer Networks, SDLC, Problem Solving, Team Collaboration

EXPERIENCE

Junior Software Engineer | Stratom Solutions — **Aug 2026 – Present**
- Developing the AI Native ROV & Integrated Robotics Platform, including AquaPULSE and PULSE AI, with Python-based data pipelines, ROV telemetry, AI integration, and real-time monitoring.

Generative AI Intern | Huebits Tech Pvt. Ltd. — **Jan 2026 – Mar 2026**
- Developed a Generative AI–based Career Path Recommender using Python, Flask, LLMs, and Prompt Engineering.
- Applied data processing and LLM-based logic to generate personalized career recommendations.

PROJECTS

AI-Powered Career Path Recommender — Developed an AI-powered career recommendation system using Python, Flask, LLMs, and Prompt Engineering to generate personalized career paths and learning roadmaps based on user skills and interests.

Smart Document Question Answering System using RAG — Developed a Retrieval-Augmented Generation (RAG) application using Python, FAISS, Vector Embeddings, and LLMs to enable context-aware question answering over custom documents.

CERTIFICATIONS

- Introduction to Generative AI - IBM
- Data Analytics Job Simulation - Deloitte
- Data Science & Analytics - HP LIFE
- Test Engineer Program - Infosys
- Python for Data Science - IBM
